PROFESSIONAL SUMMARY

Passionate Computer Science undergraduate with hands-on experience in web development, machine learning, and freelance academic writing. Skilled in building responsive, high-performance web applications, developing data-driven ML models, and delivering high-quality research-driven academic content. Strong attention to problem-solving, code quality, scalability, and clear communication, with a proven ability to manage diverse projects efficiently in remote and client-focused environments.

EDUCATION

Shri Mata Vaishno Devi University Kashmir Bachelor of Technology in Computer Science – 7.40 CGPA	Katra, Jammu and Aug 2023 – July 2027
S.S.S.V Intermediate College Senior Secondary – 80.02%	Ayodhya, UP Aug. 2019 – May 2021
S.S.S.V Intermediate College Secondary School - 85%	Ayodhya, UP Aug. 2017 – May 2019

EXPERIENCE

Backend Intern July 2025 – Sept 2025
Eduspheria pvt ltd

- Developed a scalable backend system to handle image file uploads, processing, and secure conversion workflows.
- Implemented RESTful APIs to manage file validation, format conversion requests, and downloadable output delivery.
- Integrated server-side image processing libraries to ensure high-quality and fast format conversions (JPG, PNG, WEBP, etc.)

Freelance (Online) July 2024 – present

Academic Writing & Web Development

- Delivered high-quality academic content including research papers, case studies, literature reviews, reports, and assignments across multiple disciplines.
- Applied proper academic formatting and referencing styles (APA, Harvard, MLA, Chicago) to meet institutional guidelines.
- Maintained confidentiality and professionalism in handling client data and intellectual property.

PROJECTS

TypingTest Web Application | [URL](#)

- Full-Stack Typing Speed Test Platform - Built a real-time WPM tracking application with user authentication and progress analytics.
- Frontend - React 18 with responsive design, Chart.js visualizations, dark/light themes, and real-time typing feedback.
- Backend - Node.js/Express REST API with MongoDB, JWT authentication, and rate limiting.
- Features - user profiles, leaderboard system, and secure user sessions.

NetflixGPT - Netflix Clone with AI-Powered Recommendations | [URL](#)

- AI Movie Recommendations: Integrated GPT API for intelligent movie suggestions based on user's natural language queries and mood preferences.
- Performance Optimization: Implemented Redux store for data caching and memoization, reducing API calls significantly.
- Enhanced UX Features: Built responsive design, multi-language support, and debounced search functionality.

TECHNICAL SKILLS

Languages: Python, Java,

Frameworks/Libraries: Django, SQL, DRF, Node.js, MongoDB, OOPS

Developer Tools: REST APIs, Agile, waterfall, VS Code, Postman

ACHIEVEMENTS

- **SIH Finalist 2025.**
