## WORK EXPERIENCE

---

### AI Engineer

*Eduspheria, Remote, Full-Time*

*June 2026 - Present*

- Designed and developed AI-powered web applications using Django, integrating intelligent AI agents with tool-calling workflows and automation using n8n.
- Built interactive AI-based learning modules and backend systems, enabling students to engage with intelligent educational applications in a scalable web environment.

### AI Intern

*Eduspheria, Remote, Intern*

*Feb 2026 - May 2026*

- Implemented and integrated LLM-based AI agents and interactive educational applications, gaining hands-on experience with AI-driven web solutions.
- Participated in the development of an AI Lab platform by implementing AI features, testing workflows, and supporting deployment of AI-enabled applications.

### Freelance Software Developer & Technical Writer

*Self-Employed*

*Sept 2024 - Present*

- Developed AI-powered applications, chatbots, and web solutions using Python and Django.
- Delivered technical documentation and research manuscripts in AI, Machine Learning, and Computer Science.
- Built client-specific software projects, including automation workflows and web applications.

## PROJECTS

---

- RoBERTa-Driven Sentiment Classification of Social Media Text**, Fine-tuned a Twitter-RoBERTa transformer model on 18,170 YouTube comments, building an end-to-end NLP pipeline that achieved 96% accuracy and 0.96 weighted F1-score for multi-class sentiment classification. [GitHub](#)
- Research Paper Analyzer**, is a fully local RAG-based research paper analyzer that enables semantic search, paper-grounded QA, layman explanations, and structured summaries using Ollama and ChromaDB [GitHub](#)
- NetflixGPT - Netflix Clone with AI-Powered Recommendations**, Built a Netflix clone with GPT-powered movie recommendations based on natural language prompts and moods, optimizing performance using Redux caching while implementing responsive UI, multilingual support, and debounced search.
